***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 and 38-46, drawn to performing placement, classified in class 716, subclass 9.
- II. Claims 30-33, drawn to coordinating exchanges among distributed parallel processing units regarding placement, classified in class 712, subclass 11.
- III. Claims 34-37, drawn to a processing unit, classified in class 707, subclass 101.
- IV. Claims 47-55, drawn to performing placement, classified in class 716, subclass 9.
- V. Claims 56-60, drawn to performing placement, classified in class 716, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, IV, V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as updating, invention IV has separate utility such as assigning placement engines and clustering, invention V has separate utility such as performing transformations. See MPEP § 806.05(d).

Inventions I, IV, V and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case each of the processes as claimed can be practiced without the coordinating.

Inventions I, IV, V and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

Art Unit: 2825

806.05(e)). In this case each of the processes as claimed can be practiced without the operation of a content addressable memory.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert Popa on 11/02/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

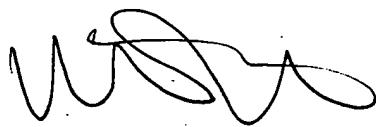

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leigh Marie Garbowski whose telephone number is 571-272-1893 and e-mail is [Leigh.Garbowski@uspto.gov](mailto:Leigh.Garbowski@uspto.gov). The examiner can normally be reached on days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Smith can be reached on 571-272-1907. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
